FREE VIRTUAL SUMMIT for MLPs in the Southeast US

*Partnership in the Age of Climate Change.
MLP Strategies and Opportunities for the Southeast US
in 2020 and Beyond*

Building upon the MLP statewide and regional conferences held in Florida since 2016, this Summit will bring together Medical-Legal Partnerships (MLPs) from across the Southeast United States. This year's summit is structured primarily as an interactive workshop with a half day focused on climate change as a health issue.

The Summit will feature both plenary sessions on GoToWebinar along with small group workshop sessions, and is appropriate for healthcare, public health, and legal team members, as well as for funders and insurers who are currently (or hope to begin) investing in MLPs. Join us for a FREE half day Summit that will:

Connect you with colleagues throughout the Southeast US who are engaging in or contemplating MLP; Provide opportunities to engage in interactive workshops focused on drafting advocacy templates relevant to legal issues resulting from climate change; Feature insights from healthcare, legal, and public health leaders from throughout the Southeast US; and Continue our efforts to promote MLP sustainability and regional collaboration for 2020 and beyond.

*We will take a 15 minute break each hour.
